

October 16, 2009

Greetings of peace and solidarity from the captive Prisoners of War at United States Penitentiary-Hazleton. The Black is Back Coalition statement was warmly received in our chilly, government confinement center. History has illustrated that when the oppressed unite and stand strong on a positive, progressive agenda, they usually gain victory against a repressive state. This coalition must not waiver or break because of counter measures implemented by right wing racists whom have crawled from their rabbit holes due to an Afrikan American being elected as their president. Rethink failures of the past, insert new ideas and stand as strong as steel in your pursuits. The state is far more repressive now since the events of 9/11. So you must vigorously overcome the challenges that you will face. Stand firm coalition constituents, because any disagreement the state can project amongst this group will be leveled. Don't allow past manipulation tactics to destroy the work set upon you all. Let history prove that "a fall in the pit, is again in the wit." Done through the example you'll establish in accomplishing your tasks. The People need strong leadership in a time when unemployment is at an all-time high, homes are being foreclosed upon, and racism is on the rise. Do not allow the military to send your sons and daughters into unjust, unsupportable wars. Build alliances that are genuine, constructed on shared values, and concrete analysis of present day problems, not hypothetical renderings that amass nothing but confusion. Build to Win, Learn to Listen and Build a Coalition!

Revolutionary Greetings,

Kojo Bamani Sabubu (Grailing Brown), Thomas W Manning #10373-016, United Freedom Frontiers
