

## **The Black is Back Coalition Solidarity Statement October 2009**

“..., the Supreme creation of a human community, the Product of its deep-seated urge to fulfill and perpetuate itself...it is primarily a group problem-solving device instituted by a human community to cope with its basic practical problems...”

-anthropologist, Laura Thompson

Revolutionary Greetings: (New Afrikan Family)

Thank you Great Sista, Efia. I received the notice, “Help put US Political Prisoners, POWS, Exiles on the US Political Agenda”, advising me of the November 7, 2009 march and rally beginning in Washington, DC’s historic Malcolm X Park. New Afrikan organizations are currently in a critical phase...in need of a transformation, of new leadership, more radical encouragements, and new resources. Our movements are in a state of decay, and our people are in fast increasing numbers joining the ranks of those forces who oppose our existence. So, it is extremely imperative that from the ruins of unsuccessful attempts, we organize a force for change and strategically build a more viable and effective force. If the Black is Black Coalition can tow the line, you will have my endorsement, solidarity and my service.

I’m terribly discouraged and disappointed that our parent organizations, Republic of New Afrika, New Afrikan Independence Movement, New Afrikan Liberation Front and others have experienced a low tide these past five to ten years. We must work to breathe life back into our brothas and sistas. We all are experiencing a form of post-traumatic oppression syndrome. Let us all join forces with our New Afrikan brothas and sistas who have organized the Black is Back Coalition. They need us just as President Barack Obama needed you to win his election, but sadly, he has shown the People his real hand.
